Subject: Heroin related deaths

Joe

I wanted to follow up. I thought we had provided these maps to your office but we had another media request for information on heroin deaths in 2011 so I wanted to make sure.

These are broken down by District. I believe 1 death was originally suspected a heroin OD but was later changed so the total is 105. I can try and pinpoint exactly where and get new maps done but it will take some time to do so. Statistically shouldn't not change much but I wanted to share so you could pass along to members.

Maps go back to 2009. Our draft report is back until 2007. **There has been a significant increase over the past 3 and 5 years as well as significant increase outside of the City of Cleveland.**

Call if you or anyone has any questions.

Hugh
